

# Support for your sustainability reporting

We can help you in identifying the sustainability reporting standards which suit you best. According to your targets and customer requests, we support you during all stages of your participation, including application, data compilation, calculation of corporate carbon footprints and preparation of the information which is required for questionnaires or communications on progress (CoP).

By means of our sustainability intelligence dashboard, we help you to effectively manage all requests regarding sustainability information and successfully use them for communication purposes – worldwide.

Contact us for further information  
and references!

DFGE – institute for energy, ecology and economy – was founded in 1999 as spin-off of the Technical University of Munich and offers complete consulting, software and audit solutions in the field of CSR. Our offer Sustainability Intelligence comprises management and reporting solutions related to CSR and sustainability topics (among them being greenhouse gas emissions), and refers to international norms in this field. Our clients comprise international companies (DAX and fortune 500), SMEs, governmental organizations or territorial authorities.
