

DFGE started already years ago to explore the possibilities of machine learning, especially neuronal networks.

In the course of technological development and the possibilities of IT-based processing via big data and data science, DFGE offers solutions for different fields of application - especially the further development and optimization of Corporate Social Responsibility (CSR) applications with focus on artificial intelligence .

Sustainability needs facts

Sustainability Intelligence for your CSR

Contact us! www.dfge.de 

Founded in 1999 as a spin-off of the technical University of Munich, the DFGE – Institute for Energy, Ecology and Economy provides consulting services in the field of sustainability. Our offer Sustainability Intelligence featuring calculation management and reporting solutions aims at bundling the effort of taking part in several sustainability/CSR standards and rankings like CDP, UNGC, EcoVadis or GRI. Our services are structured according to our ACCoRD scheme: Analyze, Collect, Compose, Review, and Document, to foster continuous improvement and collect reliable data. Our clients range from international companies (DAX and fortune 500) to SMEs. Our partners are key players in the domain (such as CDP and EcoVadis), and we constantly monitor the current trends and existing norms, to support the organizations with dedicated solutions.

- You want to ensure that your sustainability communication is based on sound facts
- You have to reduce internal efforts for data collection
- You look for an expert in corporate and product carbon footprint calculations
- You do not look for an advertising agency
- You look for solutions rather than long lasting projects

We look forward to hearing more about the challenges you face

Support for your sustainability reporting
