

CDP CLIMATE CHANGE

Getting better at CDP? Use DFGE's expertise for your successful participation in the CDP.

Your entire supply chain is required

CDP is an independent organization that annually requests information from thousands of listed companies and other organizations worldwide. With the "CDP Climate Change" questionnaire, companies are asked to provide information on their CO2 emissions as well as reduction targets and strategies. Participation in the CDP is a task that requires a lot of know-how and ties up resources.

- We work with available data and information within your corporation.
- We calculate the global corporate carbon footprint of your company according to the DFGE TopDown approach. This carbon accounting ensures a valid result within weeks.
- We deliver the final questionnaire for you to submit. Due to our experience we help you to allocate the right information in order to gain a higher rating.
- Our transparent approach provides a clear view on emission sources and reduction potentials. You control the overall project and following next steps in your sustainability strategy. The data and results of your CDP participation can be perfectly leveraged in other CSR communications.

As a CDP silver climate change consultancy partner we help responding companies with the completion of their CDP questionnaire from data collection to final submission. With our expertise and as accredited provider, we can minimize efforts and resources at your end and ensure a successful participation with our solutions.

"The customer requests for the CDP Climate and Water program have confronted us with major challenges. With the DFGE, we have found a partner that offers the calculation of the data, the strategic advice as well as the editing of the questionnaires from a single source."

Sabine Konrad-Schwämmlein,
Environmental Affairs, Woco Group

Institute for Energy, Ecology and Economy

CDP CLIMATE CHANGE

Transparent and valid results in 6-8 weeks

YOUR ADVANTAGES

- Being an official CDP Silver Climate Change Consultancy Partner, we know the methodology of CDP.
- Save time and effort and make use of our expertise.
- Already for several years, we support some well-known CDP participants and help them to improve their answers for a better CDP performance.
- We can help you to hold your supply chain to account, and we can support also their CDP participation.
- We take care of our customers in an integrated way – your CDP participation is just one part of CSR. Our Sustainability Intelligence solutions create transparency and synergy, no matter in which reporting initiative you participate.
- We do not see ourselves as consultants which accompany you for months on site and conduct long lasting projects, but in contrast as service providers – in order to minimize resources you have to invest for a successful CDP participation.
- Also, we are not an advertising company which makes your charts look more beautiful. Originally, we come from science, and that still influences the way we work today.

Founded in 1999 as a spin-off of the technical University of Munich, the DFGE – Institute for Energy, Ecology and Economy provides consulting services in the field of sustainability. Our offer Sustainability Intelligence featuring calculation management, reporting solutions and strategy development aims at bundling the effort of taking part in several sustainability/CSR standards and rankings like CDP, UNGC, DJSJ, EcoVadis or GRI as well as building overarching strategies, such as a sustainability strategy according to the SDGs. As the unique partner of the CDP for SBTs, DFGE provides its customers with comprehensive advice on climate strategy and helps them to operate climate-neutrally at product level or company-wide. To enable a future AI-based CSR management, DFGE researches in big data approach and machine learning. Our clients comprise international companies (DAX and fortune 500), SMEs, governmental organizations or territorial authorities.
